

1928 Durant Model 65 Touring Serial Number E 7697

We tried to restore and preserve the original facade and the characteristic roof structure. It took us twenty-one years to finish this project, because while we were working on it we were buying cars and restoring them simultaneously.

We are proud that this project was fully developed and supported by us, and all the work was carried out by our own hands gathering the efforts of all the family. They, Andres, Carla and Evelin, together with friends and suppliers, have collaborated to make this utopia a reality.

Now our hope is that when you come here you can travel in time. We prepare you the space, you only have to enjoy and let your imagination fly.

Jorge and Cecilio Pablo Rau

For many years there has lived in our hearts this deep love for everything related to our passion: antique cars.

After years of uncountable sacrifices, time devoted and kilometers travelled looking for cars and spare parts of our interest, we get this private collection. Everything started like a dream, with a little museum in the home backyard, thinking about offering to young people the possibility of knowing and experiencing a different era; to those who have lived it, to enjoy it again and to old car fans to find unique pieces.

This dream came true when we created "The Rau Collection Museum".

The path was not easy since in 1984 we bought this old building dating back to 1875. This was declared architectural patrimony of La Plata City County, and was in the beginning a little church belonging to the actual Tolosa City.
