Durant Motors Automobile Club

Dear Durant Motors Club Member,

We are asking for your help to create an updated accurate registry of the existing Durant related automobiles in your possession.

The need for the Registry is many fold, it is mainly to accurately preserve the history of all Durant associated dealings with the companies, factories and vehicles they produced, it also acts as an accurate historical source for researchers, restores, and acts as a starting place where technical dialogue between like model owners can begin.

The preservation of accurate historical facts is a monumental task requiring many many hours of research and cross referencing of minute details, this can only be accomplished with the dedication of a coalition of like minded people and the Durant Motors Automobile Club membership providing accurate and complete as possible details, to put forth the best possible Durant information for the rest of the world to see.

This is not only the history of Durant, this is your clubs heritage and deserves a place in the great world of automotive history, the interaction of club members sharing and participating in the updating of the registry will form many new unique and strong caring relationships, a brotherhood if you will of Durant Partners for your life and generations to come.

The current registry is has not been up-dated for some years now, and is sadly lacking in membership participation to provide complete and accurate details of their vehicles, the site also has several errors that have come to light after exhaustive research by a small dedicated group which need to be corrected to put forth the most accurate and up to date registry possible, Again this is your clubs heritage and needs to be worthy of standing the test of time like any other important historical document.

USA members can mail to Bob Smith, all other countries to Steve Large

I hope you will take the time to make this happen, Thank you,

Steve Large
