# How to add an image to Message Forum

To post pictures on the DMAC forum make sure the image you are linking to is stored on a webserver that allows you to remotely link to it. A good FREE site to store pictures can be found at ttp://photobucket.com.

**With Photobucket**

1. Upload your image
2. Use your mouse to either click or hover over your picture. A menu will drop down with four selections, click only once in the box named "IMG Code". This will copy the link information into your computer;s memory.

3. Next Paste the text into your Forum posting. Edit the letters in the top and bottom brackets to lower case i.e. [IMG] change to [img] and click "Preview Message".

Re: New Book "Durant's Right-Hand Man"

Email

Please type the letters you see

AWYR ➡

4. When you see your image  enter the security code click "Post Message"

Other image hosting sites will work much the same way.
